BUILDING OPERATIONSSOUTH AUSTRALIAJUNE QUARTER 1961

A summary of building operations in South Australia from 1956/57 to June 1961 is shown in Table 1 of this bulletin. More detailed information concerning types of houses, other new buildings, employment in the building industry, and dwellings within Local Government areas, is given in Tables 2 to 7.

SCOPE

This Bulletin includes details of "New Buildings", which include Houses and Flats as well as the classes of building shown in Tables 3 to 5 plus major additions (£5,000 and over) to these buildings (other than houses), but excludes (1) minor alterations, additions, repairs, and renovations, and (2) all construction activity such as railways, bridges, earthworks, water storage, etc.

COMMENTS

Table 1 shows that 2,286 houses were commenced and 2,333 completed during June quarter 1961, increases over figures for the previous quarter of 219 and 257 respectively; in June quarter, 1960, commencements numbered 2,145 and completions 2,220. The record number of houses commenced was 2,573 in September quarter 1960.

The number of flats completed during June quarter 1961 (230) was 75 more than for March quarter 1961.

In each of the last three quarters the number of dwellings completed has exceeded the number commenced; by 320 in the December quarter 1960 and by 50 and 164 respectively in the March and June quarters this year. As a result there has been a reduced number of dwellings under construction at the end of each successive quarter.

The considerable fluctuations from period to period in the value of "new buildings other than dwellings" in Table 3 are partly the result of the unequal incidence of individual large contracts. In one case a single contract may be let for a large project thereby inflating values during the quarters covering commencement, construction, and completion of that project, but in another instance a number of small contracts may be let over a protracted period and thus have little apparent effect on the totals for the quarter. Table 4, which shows the value of work done on the various types of new buildings during each period, is not subject to these fluctuations. The different unit values of new buildings commenced during different periods are shown in Table 5.

Employment on all jobs of builders of new buildings at 30th June 1961 (Table 6) showed a further decline of 485. The total of 12,416 was the lowest since 31st March 1959, when 12,153 were shown as employed.

Table 7 indicates that a large proportion of home building is still concentrated within a few local government areas. During the quarter ended 30th June last 1,103 (79.2%) of the houses completed in the metropolitan local government areas were in the Municipal Corporations of Campbelltown, Enfield, Marion, Mitcham, Port Adelaide, West Torrens, and Woodville.

Completions in the near metropolitan District Councils of Noarlunga, Salisbury (which includes the greater portion of Elizabeth), and Tea Tree Gully, together with those in the Whyalla Town Commission area, accounted for 62.5% of dwellings completed outside the metropolitan area.

DEFINITIONS

Values - All values shown exclude the value of land and, except for Table 4, represent the value of buildings upon completion (but see also "Completions"). The values shown in Table 4 represent the value of work actually done on new buildings during the

10/01 to 03 .off attached 10/01

Commencements - A building is recorded as commenced when work on the foundations has begun.

Under Construction - Once commenced, even though work on it may have been temporarily suspended, a building is classified as "Under Construction" until its "Completion" - see next paragraph.

Completions - A building is regarded as having been completed when the contractor has fulfilled the terms of the contract or in the case of an owner-builder when the dwelling is either completed or occupied (whichever occurs first). However, the value shown in all cases is that of the building as a finished project as planned.

(a) An "owner-built" house is one actually erected or being erected by the owner or under the owner's direction by sub-contract or day-labour but without the services of a contractor who is responsible for the whole job.

(b) "Other" houses are mainly of fibro-cement or weatherboard construction, e.g. included in the 988 "other" type houses completed during 1960/61 (823 contract-built and 165 owner-built) 919 were of fibro-cement construction valued at £2,497,000, and 60 of weatherboard with a value of £223,000. During June Quarter 1961 there were 173 (£536,000) fibro-cement and 11 (£46,000) weatherboard houses completed.

(a) Covers all contractors and sub-contractors and employees of contractors, sub-contractors, and Government instrumentalities, who on the day specified were actually engaged on the construction, alteration, repair, and maintenance of buildings, but excludes persons working on owner-built houses or for contractors or sub-contractors who undertake only alterations, additions, repairs, and maintenance. Persons "actually engaged" include those temporarily laid off because of weather. Some duplication may occur as a result of frequent movement between jobs or because some persons (such as electricians) may work on several jobs which are under construction simultaneously.
